

TL410P R6 CS 4K Resolution Day/Night lenses up to 1/1.7" sensors

- Ultra high resolution for 4K cameras, up to ✓ 12.4 megapixel
- P-iris for precise aperture control
- Fully motorized with zoom, focus, iris, IR √ cut, limit switches
- Optional motor control board (MCR600 or \checkmark MCR400) available for easy integration
- IR corrected for true Day/Night cameras \checkmark
- \checkmark Compact design to fit into domes as small as 4" mini-dome size
- CS-mount \checkmark
- ✓ Used for sensor sizes 1/2.5", 1/2.3",1/ 2" 1/1.8", and up to 1/1.7" (Sony IMX178, Sony IMX226 for example)

Entrance pupil location

The entrance pupil location is inside the lens. The first lens element vertex or the lens plastic can be used as a reference to find the location.

*Theia's motor temperature calculator can be used to estimate the focus and zoom motor temperatures after a set number of run/ cool down cycles. This can be downloaded from Theia's website (see the QR code below).

The example below shows 60C ambient temperature and 3.5V motor. The motor is driven for 10 seconds with 10 seconds cool down between moves. After 3 moves, the motor is allowed to cool down which takes about 4 minutes.

Zoom and focus **motor positions may be affected by backlash and lost steps during movement. Lost steps are affected by the driving conditions. It is best to drive the motor between 600pps and 1000pps. Within these limits, the lost steps are tested to be <40 steps per full zoom range and <30 steps per full focus range.

Notes:

These motorized lenses are intended for integration into cameras and require motor drivers and controllers. Typically, Theia works with the camera manufacturer to ensure that the camera motor controller matches the lens. It is possible to supply your own motor controller, but Theia cannot guarantee that your motor controller will not damage the lens. Theia does not offer any warranty on the suitability of these motorized lenses for any particular camera. These motorized lenses are **not intended for continuous use** of the motors as in PTZ applications. Theia offers motor control boards that are suitable to control motorized lenses with P-iris.

Revisions

Version	Change	Reason
220401	Templated spec sheet	Family spec sheet can be reduced for each lens model to simplify spec sheet
220516	Alternate lens table	Updated to separate non-motorized versions
220920	Formatting error in focus/zoom motor table	Row data and headers were on different rows
	Remove near focus/far focus positions	Not relevant to customers, removed for clarity
240130	Updated Zoom/Focus Motor Map	Error in step count
240813	Removed reference to motor acceleration	Not implemented in Theia's controllers
